

## Project Planning – Tales from Around the World

Class Newton

We will be looking at a story from China to start off with. We will be marking where this is on a world atlas. As we read our tales from other countries we will locate them on the world atlas. We will also look at The United Kingdom and the different parts.

We will name and locate the world's seven continents. We will locate China and look at some of the country's traditions and food.

We will also be looking at Norway and Iceland. Finally, we will identify the UK and all the parts. We will be plotting where some of our food comes from making links to our tales. (Africa-Handa's surprise.)

In Science we will be looking at where food comes from and sorting it into different groups. We will look at how to eat healthily and what we need to keep healthy.

We will identify seasonal changes and what happens also comparing other continents that do not have autumn or winter as we know it.

In art and design technology we will be designing and making dragons and lanterns.. We will begin to learn how to sketch items and complete some ink prints of fruits. We will start to use water colours and pastels to create art work.

We will look at different recipes to sample some foods from the places that we visit through our tales. We will follow instructions to make some Norwegian biscuits and some traditional

Finally, we will end with the story about Jesus' birth and plot this on the atlas. We will compare the weather in his birth place with the uk.
