

Project Planning – We dream the colours from the sea.

Class - Newton Summer 2021

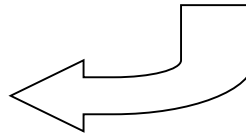

We will start with looking at the geographical parts of the sea side- physical and human and start mapping skills. In science we sort things into alive and never lived? We will look at the sea side activities and all the things one can do there.

We will learn about classification of the sea creatures found in the sea. It is very important to care for these creatures as best we can and we will look at habitats and the eco system. We will be reading maps and using grid reference.

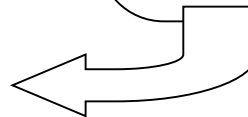

Next, we will learn about the seaside holidays of the past both in Victorian times and in the 1960's. We will look at how people got to the sea and what they did there, their dress codes and the use of bathing huts etc.

We will learn about famous Pirates both male and female and learn what their lives were like. We will do some cooking and make the dry, hard biscuits they used to eat. We will dress up as pirates for a day and have a pirate party.

We will learn about the Eco system and what we can do to keep our beaches clean. We will talk about the use of plastic bags and pollution.

Finally, we will learn about the sea and safety. We will create some safety posters and talk about the dangers that the sea can present.

In art we will look at post cards and recreate some ourselves using pastels. We will design and make an under the sea wind up scene. Also we will look at the artist David Hockney's pool scenes and his water pictures and create some of our own.
