Project Planning – Over and under the sea

Class Newton

In science we start with what things are alive and what has never lived? We are going to look at the sea side and what activities one can do there. We look at the features of the sea side Physical and human and begin to use mapping skills.

We will look at classification of the sea creatures found in the sea. It is very important to care for these creatures as best we can and we will look at habitats and the eco system. We will be reading maps and using a

Next we are going to look at seaside holidays of the past both in Victorian times and in the 1960's, how people got to the sea and what they did there. The use of bathing huts etc.

We will look at famous Pirates both male and female and learn what their lives were like. We will do some cooking and make the dry hard biscuits they used to eat. We will dress up as pirates for a day and have a pirate party.

Lastly we will look at the Eco system and what we can do to keep our beaches clean. We will talk about the use of plastic bags and pollution.
